

PRESS RELEASE

RCCP welcomes Clinical Exercise Physiologists to the Professional Standards Authority accredited register

The Registration Council for Clinical Physiologists (RCCP) is delighted to announce that Registration is now open for Clinical Exercise Physiology (CEP). This represents a huge step for the RCCP, this professional group and for healthcare in the UK and has largely been made possible by the formation of a new partnership between The British Association of Sport and Exercise Sciences (BASES), the professional body for Sport and Exercise Sciences in the UK and Clinical Exercise Physiology - UK (CEP-UK). This partnership has worked closely with RCCP over several months to ensure eligibility for professional registration for clinical exercise physiology.

“CEP’s perform a key role in prescribing exercise, physical activity and lifestyle changes to enhance health, prevent chronic diseases and assist in rehabilitation and rehabilitation of clinical populations” (CEP -UK). For more information on Clinical exercise physiology visit: Clinical Exercise Physiology - UK (CEP-UK; www.clinicalexercisephysiology.org.uk)

To apply to the RCCP Register visit: <https://rccp.co.uk/become-registered/how-to-apply/>

CEP-UK and BASES have also released information relating to this announcement, please visit:
